

FOR IMMEDIATE RELEASE

ValuePoint Partners to Rollout Wi-Fi Service at Pacifica Host Hotels

San Bruno, CA – August, 2003 – ValuePoint Networks, Inc. and a San Diego based wholesale broadband wireless access (BWA) provider have formed a strategic partnership to provide Wi-Fi guest access to a number of hotels, in a major new rollout.

ValuePoint will provide advanced 802.11 Wi-Fi Access Points (APs) for the deployment of Wi-Fi and Internet services in the hotels. Hotel guests will be able to connect to the Internet with their own standard 802.11b wireless device, or the hotel can provide one to guests.

Included is a major deployment at 20 Pacifica Hotel properties in addition to existing sites such as the Holiday Inn Select in Mission Valley, San Diego, CA. Using the SuperAP™ Rugged Access Point provided by ValuePoint, hotel guests will now have an option to get connected with high-speed Internet access in each of the hotels' rooms, as well as the other indoor and outdoor areas of the hotel grounds.

“We're proud to be partnering with an outstanding organization”, commented David Grissom, ValuePoint's VP of Business Development. “Our partner is committed to provide their customers the best Wi-Fi equipment and services, and we are happy to be a key part of their solution.”

Saeed Khorami, Head of the Wi-Fi Services Team, found the technical features of ValuePoint products to be compelling. “We get a tamper-resistant and rugged AP with transmit power levels up to 200mWatt, external antennas, 802.3af Power over Ethernet, SNMP, and easy installation. ValuePoint delivers solutions tailored to our needs. With this partnership we can deliver successful installations like the Holiday Inn, and we are now working on more.”

Future hotel deployments will continue to leverage ValuePoint's Public Access Wi-Fi hardware ValuePoint and its partners are solving the unique access and security requirements of hotels today utilizing wireless hardware specially designed for the needs of hotels and other large public venues combined with its partners' expertise in public network design, deployment, and billing.

About ValuePoint Networks

ValuePoint is a manufacturer of Wi-Fi products for service providers, small and medium sized businesses, and the shared access market. ValuePoint's products are designed for the unique needs of Service Providers, Wireless ISPs, Billing Providers, and Venue Operators in the burgeoning mobile access space.
