VALUEPOINT SUPPLYING HIGH POWER WI-FI GEAR TO CITY OF BENTONVILLE, ARKANSAS

SAN FRANCISCO, CA, May 29, 2007 -- ValuePoint Networks, Inc. is supplying high power outdoor WiFi gear, and gateway controllers, to the City of Bentonville, Arkansas for a new WiFi service being offered by the city. Bentonville is home to the corporate headquarters of Walmart Stores, Inc.

"The ValuePoint Networks gear is great", says Jonathan Rogers, city systems manager. "We have used it in our first public Wi-Fi access area and we would be happy to tell other municipalities about how well it works for us."

"We are working with lots and lots of small to medium sized cities who need to offer Wi-Fi services today, on a justifiable budget. The City of Bentonville had evaluated a "who's who" of wireless equipment vendors but were dissatisfied with all of them. Every one was way too expensive. Then they found us. Our products were deployed in a couple weeks and they are extremely satisfied with the results." says David Grissom, VP Business Development for ValuePoint Networks.
