HOTZONA WI-FI USES VALUEPOINT FOR ARIZONA CAPITOL GROUNDS

Rugged, High-Power Access Points Withstand Desert's Extremes

Phoenix, AZ. – April 7, 2006-- hotZona, Inc a leading provider of Wi-Fi Internet Access throughout the State of Arizona, has extended the popular AZPower Free Wi-Fi Network to the Arizona State Capitol Outdoor Grounds, using ValuePoint Networks' SuperAPs to provide full outdoor coverage all year round.

“We have used ValuePoint’s SuperAP products previously for long range outdoor bridging, and their products have withstood two hot desert summers without a glitch. After evaluating a list of vendors, we decided to use ValuePoint again for the State Legislature project. In addition to being rugged, the SuperAP product offers the best remote manageability,” said Fowler Brown of hotZona.

Fowler added, “Extending the AZPower network to the outdoor grounds is something the State Legislature has needed for years. The technology brought by ValuePoint Networks lets us do it cost effectively. Outdoor events now have Wi-Fi access, such as the Distance Learning program recently held on the grounds. The benefit to government, the press, and the public is huge.”

“hotZona is an excellent partner for us because their coverage and environmental demands are a perfect example of where our products shine. Often people ask us ‘how do your products survive in the harshest of conditions’. Surviving the Arizona desert is good testimony,” said David Grissom, ValuePoint Networks’ vice president of business development.

About ValuePoint Networks

ValuePoint Networks is a manufacturer of controllers and rugged access points for distributed Wi-Fi applications. ValuePoint’s products are designed for the unique needs of service providers, wireless ISPs, billing providers, and hospitality. This includes hotels, RV parks, marinas, airports, multi-tenant units, multi-dwelling units, and outdoor wireless applications. For more information on ValuePoint’s controllers, rugged access points, and accessories, please visit www.valuepointnet.com

About hotZona Networks

hotZona Networks designs, deploys and manages secure wireless networks. hotZona has created and currently manages some of the largest free and fee networks in the state of Arizona. These installations include the AZ Power Network for the Arizona Legislature and Senate, Sheraton Desert Oasis, Soma Café and many others.
