12 dBi Omni Antenna

High Power Wi-Fi with Indoor/Outdoor Omni Antenna

ValuePoint™ Networks Omni-directional Antenna is designed for **indoor/outdoor** Wi-Fi deployments in a hotel, apartment building, airport, or other public venue. It has a 12 dBi gain and makes a nice compliment to SuperAP™ or MultiAP™ when used with an N-N antenna cable. The beam characteristics of the 12 dBi omni are perfect for mounting above dropped ceilings in order to cover a large area, such as a conference room, hotel room floor, restaurant, or lobby area. The omni antenna comes with its own mounting bracket for easy installation. Pricing for the omni antenna is more cost effective than ever before, dramatically lowering your infrastructure costs, and increasing your Return on Investment.

Hardware Features

Type: OMNI antenna

Linear: V or H

Frequency: 2400-2483.5MHz

Impedance: 50 ohm

VSWR: ≤ 2.0

Gain: 12 dBi

Connector: N-Type Female / N-Type Female Reverse

Power handling: 20 Watt

Size: 36 inches length

Weight: 600g

Operation temp: -30 C + 60 C

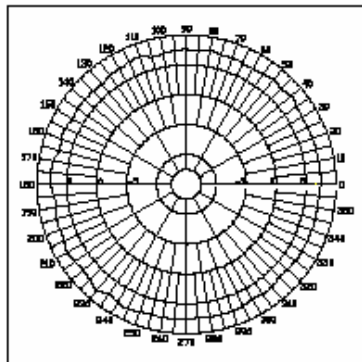

Material:

Guard Hole: fiberglass Mount: Stainless steel, Electro-plating
