10 dBi Yagi Antenna

NLOS 900 MHz Outdoor Yagi Antenna

ValuePoint Networks' 900 MHz 10 dBi Yagi Antenna is used with the Super900DR for long range point-point and NLOS applications. The beam characteristics of the 10 dBi Yagi are more focused than the flat panel making it an excellent choice for outdoor applications. The Yagi antenna comes with its own mounting bracket for easy installation. Pricing for the Yagi antenna is more cost effective than ever before, dramatically lowering your infrastructure costs, and increasing your Return on Investment.

Hardware Features

Type: Yagi antenna

Linear: V or H

Frequency: 860-930MHz

Impedance: 50 ohm

VSWR: <2.0

Gain: 10 dBi

Connector: N-Type Female / N-Type Female Reverse

Power handling: 10 Watt

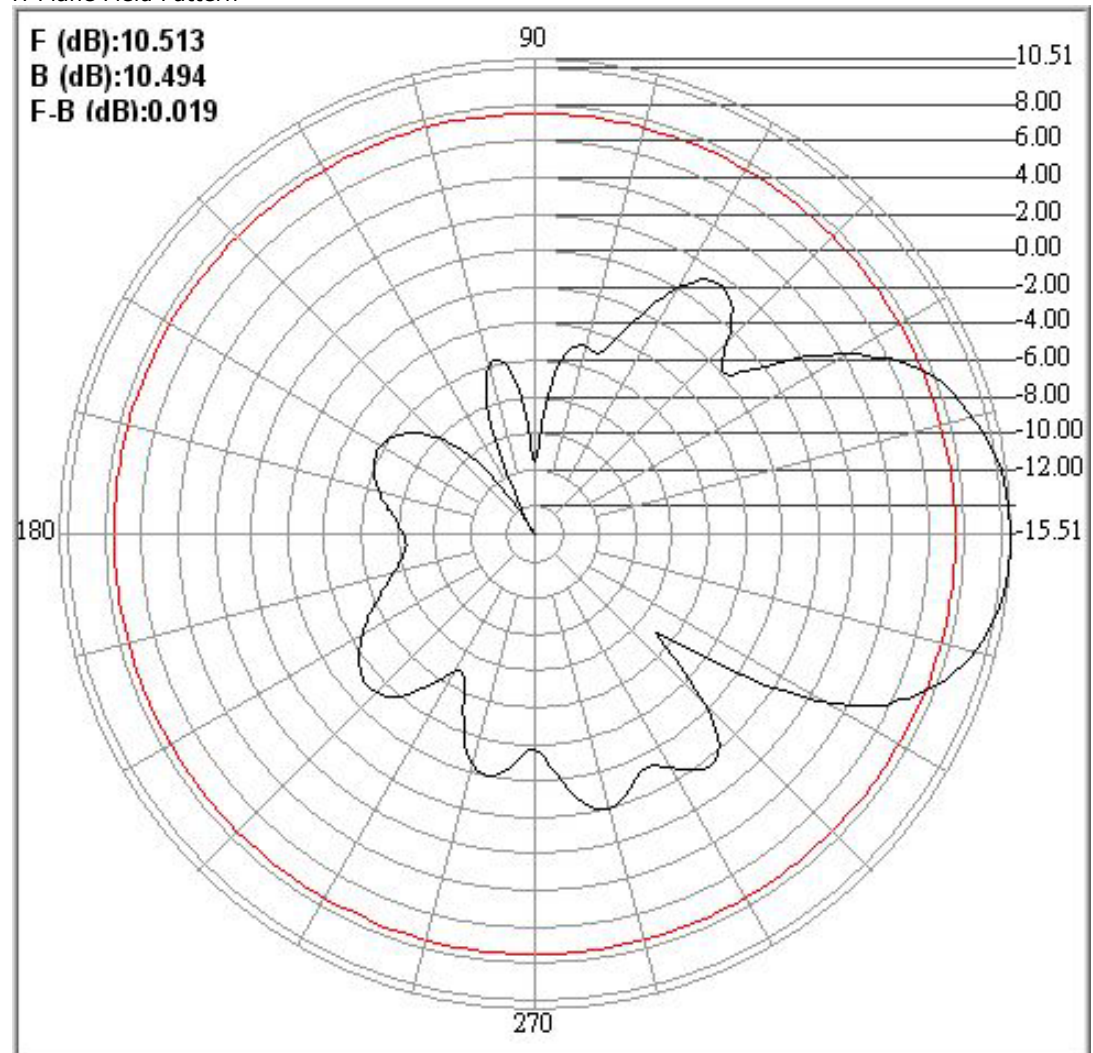

Size: 941x20 mm

Weight: 640g + 20g (w/ mount)

Operation temp: -30 C + 60 C

Technical Specifications

H-Plane Field Pattern

E-Plane Field Pattern
