SuperUSB

High Power 802.11g Wi-Fi USB Client Adapter

ValuePoint Networks' 200 mWatt SuperUSB range extender significantly extends the Wi-Fi range of a client's laptop by providing a super strong return signal to the access point, hence extending the overall reach of the network. The SuperUSB resolves the "weak link" in many Wi-Fi networks, especially those used in hospitality, municipality, industrial, and WISP applications with many users connecting from far away or through walls.

Technical Specifications

23 dBm (200 mW) Transmit Power radio plus 5 dBi Antenna
Receive Sensitivity – 11 Mbps < -82 dBm, 54 Mbps < -70 dBm
Site Survey/Link Quality Tool
Throughput Meter
WEP, WPA, WPA2, 802.1x, AES
